Level - Verry Good

Skills

- Main**
- HTML, CSS (Responsive), Javascript, Typescript
 - Familiar with frontend frameworks and libraries such as Angular, React
 - Have an understanding of Nextjs
 - Proficient in using UI design tools such as Figma.

Other • I can both verbal and written communication in English

Awards

10/2021

Student honoring ceremony

Best subject internet of things

CIMB Paperless

(01/2024 - Present)

Client	CIMB Bank (Singapore)
Descriptions	As part of CIMB Bank's paperless initiative in Singapore, we spearheaded the digital transformation of traditional paper-based processes. My role involved developing and implementing digital forms for clients to manage their account preferences seamlessly. This included enabling clients to customize their E-Alert Notification Profile, opt in/out of eAdvice delivery, specify their account statements' delivery preference (email/post), and streamline the digital signing process. By successfully transitioning clients to digital channels, we significantly reduced paper usage, improved operational efficiency, and enhanced the overall customer experience. Our efforts not only aligned with CIMB Bank's sustainability goals but also positioned the bank as a leader in digital banking innovation.

Sacombank-Adobe DXP (<https://sacombank.com.vn>)

(12/2022 - 12/2023)

Client	Sacombank
Descriptions	In this project, we implemented a landing page for them. During this project, I improved core JavaScript, where everything in the UI is mostly pure JavaScript. In addition, I have more experience communicating between the frontend and backend in server-side projects rendering everything routing or displaying as backend control.
